# **Air Source Heat Pump Upgrade Form**

For converting electric or non electric heating systems to Heat Pumps All sections must be completed by the installer at the time of installation.

## **Eligibility:**

- Available for existing single-family and existing manufactured homes
- Existing heating system type must be electric heat pump or non electric system
- Heat pumps must be AHRI rated, and have a minimum of 7.5 HSPFs and 13.4 SEER2 rating
- Must have a variable speed compressor, include manufacturer documentation that the outdoor compressor includes variable speed or inverter driven technology (e.g. specification sheet, brochure, or screen shot). Note: Including the text "variable speed" on the invoice will not satisfy this requirement. Additional documentation is required.
