

TEC COMMUNITY SOLAR PRODUCTION

05/01/2018

April 2018

	<i>March</i>			<i>Y-T-D</i>		
	<i>Plan (kWh)</i>	<i>Actual (kWh)</i>	<i>Variance</i>	<i>Plan (kWh)</i>	<i>Actual (kWh)</i>	<i>Variance</i>
<i>Solar Production – Annual Plan* Versus Actual (kWh)</i>	<i>5,480</i>	<i>4,264</i>	<i>-28.5%</i>	<i>12,088</i>	<i>9,957</i>	<i>-21.4%</i>

**2018 Annual Plan 45,675 kWh*

The month of April finished 1,216 kWh less than the plan. Year-to-Date we are running 2,131 kWh behind but the large production summer months are just ahead of us.

Don't forget you can access all of the real-time data I am monitoring by going to the Tanner Electric Cooperative website or clicking this link <http://www.tannerelectric.coop/content/solar-display> we also have a camera pointed towards the array and horizon so that you can see weather here in North Bend and how it relates to current production.

*Steven W. Walter
General Manager*
